DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7, drawn to administration of an effective amount of forskolin for the novel purpose of psychostimulation, classified in class 514, subclass 454.
- II. Claims 8-13, drawn to administration of an effective amount of forskolin for the novel purpose of reducing food intake and appetite for food, classified in class 514, subclass 454, 910.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions are drawn to a method of administering forskolin for the purpose of psychostimulation and a method of administering forskolin for the purpose of reducing food intake and appetite. Because these inventions are distinct for the reasons given above, restriction for examination purposes as indicated is proper. Moreover, the searches in non-patent literature databases would be extensive and will not overlap thus presenting a search burden to be searched together. Thus, Inventions I and II

Art Unit: 1617

have been appropriately restricted on the basis of being both independent or distinct and presenting a search burden on the Examiner if they were to be searched together.
